Articles zamak *Zamak Items*

Zamak est un alliage de zinc, aluminium, magnésium et cuivre qui est sans plomb et sans nickel. C'est un produit de qualité qui s'agence bien avec l'étain. Les créateurs aiment l'apparence et le fait que c'est un alliage plus léger.

Zamak is a metal alloy composed of zinc, aluminum, magnesium and copper which is lead and nickel free. It is a quality metal alloy that pairs well with pewter. Designers appreciate the look of Zamak but also its lighter weight than most alloys.
